LOCATION

Kigali, Rwanda

SKILLS

Frontend

React · Next.js · JavaScript / TypeScript

Backend

Node.js · NestJS · Spring Boot · REST APIs

Data

PostgreSQL · Prisma · Database modeling & integration

Design

Figma · UI/UX design & prototyping

Workflow

Git / GitHub · Technical leadership

QUALIFICATIONS

- Udacity · Verified Certificate
- International Linguistics Challenge
- International Youth Math Challenge
- Immerse Education Certified Entrant
- Yale Young African Scholars · Completion
- African Girls Can Code Initiative
- Imbuto Foundation Award
- Ideation & Prototyping
- The Gym · Participation Certificate

Kaliza Esther

FULL-STACK DEVELOPER | UI/UX DESIGNER | TECHNICAL LEAD

Rwanda Coding Academy · High School, expected July 2027

PROFILE

Full-stack developer and student at Rwanda Coding Academy with hands-on experience in web application development, backend engineering, UI/UX design and technical team leadership. Works with React, Next.js, Node.js, NestJS, Spring Boot, PostgreSQL and REST APIs, and deploys applications across collaborative projects in research publishing, healthcare information and product development. Interested in building reliable, user-centered software and exploring AI, mobile development, IoT and robotics to address real-world challenges.

EXPERIENCE

Technical Lead

Jul 2026 – Present

RareBridge · Rare-disease information and support platform

- Maintain and improve a launched platform that helps families and caregivers find rare-disease information and support.
- Guide technical implementation and application improvements.
- Contribute to disease information, clinical-trial and specialist discovery, and community support; AI-assisted functionality (Zebra AI) under exploration.

Backend Engineer

Jan 2023 – Present

Rwanda E-Pharmacy · Pharmacy and healthcare platform

- Develop backend functionality with NestJS, Prisma and PostgreSQL (Neon), with REST APIs documented in Swagger.
- Implement authentication and role-based workflows for patients, pharmacies, pharmacists, insurance, government and administrators.
- Integrate the React frontend with the backend; deploy and test with Render and Vercel; review backend behavior, security and performance.

Runs on sample data at demo/testing stage; payment and SMS integrations are planned.

Full-Stack Web Developer

Jan 2023 – Present

TOUR · Between Minds

A student-led research publishing platform that helps people turn questions and curiosity into structured research and share their findings with a wider audience.

- Develop and maintain full-stack features across the platform, including responsive interfaces and backend services for research submission and publishing workflows.
- Design and integrate APIs, database models and application logic.
- Build researcher-facing features for submitting, managing and refining research.
- Improve platform usability for a more accessible, human-centered research experience.

EDUCATION

Rwanda Coding Academy · High School

2024 – Jul 2027

Lycée Notre Dame de Cîteaux · Ordinary Level

2021 – 2024

Espoir Primary School · Primary Education

2014 – 2021
