PROFESSIONAL SUMMARY

Frontend-focused Software Developer and UI/UX Designer with hands-on experience building modern web applications using React, JavaScript, Spring Boot, Node.js, PostgreSQL, MySQL, and MongoDB. Experienced in developing responsive user interfaces, RESTful APIs, and database-driven applications across transport, education, AI, cooperative management, and IoT domains. Passionate about creating intuitive digital experiences and solving real-world problems through technology. Seeking opportunities to contribute technical skills, collaborate with development teams, and grow as a software engineer.

TECHNICAL SKILLS

Frontend Development

- ✓ React.js
- ✓ JavaScript (ES6+)
- ✓ HTML5
- ✓ CSS3
- ✓ Tailwind CSS
- ✓ Responsive Web Design
- ✓ React Router

Backend Development

- ✓ Java
- ✓ C++
- ✓ C
- ✓ Spring Boot
- ✓ Node.js
- ✓ Express.js
- ✓ PHP
- ✓ Laravel

Databases

- ✓ PostgreSQL
- ✓ MySQL

- ✓ MongoDB

Tools & Platforms

- ✓ Git
- ✓ GitHub
- ✓ VS Code
- ✓ Postman
- ✓ Figma
- ✓ Canva

Additional Skills

- ✓ REST API Development
- ✓ UI/UX Design
- ✓ Software Architecture
- ✓ Problem Solving
- ✓ Agile Team Collaboration
- ✓ System Design

PROJECTS

Movia – Smart Transport Platform

Technologies: React, Tailwind CSS, Spring Boot, PostgreSQL

- Developed responsive user interfaces for a smart transport management platform.
- Designed booking workflows and route management features.
- Integrated frontend components with backend APIs.
- Focused on user experience, accessibility, and mobile responsiveness.

AURA AI – Intelligent Assistant Platform

Technologies: React, Node.js, AI Integration

- Contributed to the development of an AI-powered platform for intelligent assistance and automation.
- Participated in frontend development, backend integration, and system architecture planning.
- Improved user interaction and application usability.

Terimbere Cooperative Management System

Technologies: React, Node JS, PostgreSQL

- Built a digital management system for cooperative operations.

- Implemented features for member management, financial tracking, and reporting.
- Enhanced data organization and administrative efficiency.

Foodly – Recipe Sharing Platform

Technologies: React, JavaScript, Node.js and Express.js

- Designed and developed a recipe-sharing platform with responsive interfaces.
- Implemented content management and user interaction features.
- Focused on usability and modern UI design principles.

IsokoSense – IoT Water Monitoring System

Technologies: IoT Concepts, Data Visualization

- Contributed to the development of a water monitoring and management solution.
- Worked on data visualization and monitoring interfaces.
- Supported efficient resource management through technology.

NoiFix – Intelligent Noise Detection System

Technologies: Smart Monitoring Systems

- Participated in the design of an intelligent noise monitoring solution.
- Contributed to system planning and software development activities.
- Supported the integration of monitoring and automation concepts.

EDUCATION

Rwanda Coding Academy

Software Programming and Embedded Systems

Expected Graduation: 2027

Relevant Coursework:

- Software Engineering
- Web Development
- Database Systems
- Networking & Cybersecurity
- Mobile Development
- Data Structures & Algorithms

EXPERIENCE

Software Development Projects

Academic & Personal Projects

- ✧ Designed and developed multiple software solutions from concept to implementation.
- ✧ Built responsive frontend applications using React, JavaScript, and Tailwind CSS.
- ✧ Developed backend services and RESTful APIs using Spring Boot and Node.js.
- ✧ Worked with PostgreSQL, MySQL, and MongoDB databases.
- ✧ Applied UI/UX principles to create user-friendly digital experiences.
- ✧ Collaborated on AI, IoT, and management system projects addressing real-world challenges.

ACHIEVEMENTS

- ✧ Developed software solutions across transport, AI, IoT, and management domains.
- ✧ Built full-stack applications integrating frontend, backend, and database technologies.
- ✧ Participated in Rwanda Coding Academy Hackathon (2025–2026).
- ✧ Continuously expanding knowledge in modern software engineering and emerging technologies.

LANGUAGES

- ❖ English
- ❖ Kinyarwanda

AVAILABILITY

Available for Remote Internship Opportunities (30+ Hours Per Week)
