PROFESSIONAL SUMMARY

Passionate Full-Stack Software Developer with strong experience building modern web applications using React, JavaScript, Java Spring Boot, Node.js, PostgreSQL, MySQL, and MongoDB. Experienced in developing scalable frontend interfaces, backend APIs, database systems, and AI-powered solutions. Proven ability to transform ideas into functional software products through hands-on project development, UI/UX design, and problem-solving. Seeking an opportunity to contribute technical skills and grow as a software engineer through a frontend-focused internship.

TECHNICAL SKILLS

Frontend

- React.js
- JavaScript (ES6+)
- HTML5
- CSS3
- Tailwind CSS
- Responsive Design
- React Router

Backend

- Java
- Spring Boot
- Node.js
- Express.js
- PHP
- Laravel

Databases

- PostgreSQL
- MySQL
- MongoDB

Tools & Platforms

- Git

- GitHub
- VS Code
- Figma
- Canva
- Postman

Additional Skills

- REST API Development
 - UI/UX Design
 - Software Architecture
 - Problem Solving
 - Agile Collaboration
-

PROJECTS

◆ **AURA AI**

AI-powered platform designed to provide intelligent assistance and automation features. Participated in system architecture, frontend development, backend integration, and user experience design.

◆ **Terimbere Cooperative Management System**

Developed a digital management system for cooperatives to track member contributions, financial records, transactions, and administrative operations. Built features for data management, reporting, and member monitoring.

◆ **Foodly – Recipe Sharing Platform**

Designed and developed a web application that allows users to discover, create, and share recipes. Implemented responsive interfaces, user interaction features, and content management functionalities.

◆ **IsokoSense – IoT Water Monitoring & Management System**

Contributed to the development of an IoT-based solution for monitoring water usage and management. Integrated data visualization and system monitoring features to support resource management.

◆ **NoiFix – Intelligent Noise Detection & Control System**

Worked on an intelligent system focused on detecting, analyzing, and addressing noise-related issues through smart monitoring and automation technologies.

◆ **Movia – Smart Transport Platform**

Developed modern frontend interfaces for a transport management platform focused on booking, route management, and user experience optimization.

EDUCATION

◆ **Rwanda Coding Academy**

Software Programming and Embedded Systems

Expected Graduation: 2027

Relevant Areas of Study:

- ✧ Software Engineering
- ✧ Web Development
- ✧ Networking and CyberSecurity
- ✧ Database Systems
- ✧ Mobile development
- ✧ Data Structures & Algorithms

EXPERIENCE

Software Development Projects

- ✓ Built multiple full-stack web applications from concept to deployment.
- ✓ Developed responsive frontend interfaces using React and Tailwind CSS.
- ✓ Designed and implemented backend services using Java Spring Boot and Node.js.
- ✓ Worked with PostgreSQL, MySQL, and MongoDB databases.
- ✓ Collaborated on AI, IoT, and management system projects addressing real-world challenges.

ACHIEVEMENTS

- ✓ Developed multiple software solutions in AI, IoT, cooperative management, and web platforms.
- ✓ Combined frontend, backend, and database technologies to deliver complete applications.
- ✓ Continuously learning and applying modern software engineering practices.
- ✓ Participated in multiple hackathons like RCA Hackathon 2025-2026

LANGUAGES

- English
- Kinyarwanda

AVAILABILITY

Available for Remote Internship (30+ Hours Per Week)
